CAFT
Coalition to Abolish the Fur Trade

BAN THE IMPORT OF REAL FUR INTO THE UK

Every year, at least 40 million animals are killed around the world for their fur. Rabbits, mink, foxes, chinchillas, cats, dogs and numerous other animals are confined to bare wire cages or trapped in the wild, simply for their fur to be used for fashion! Since 2003, fur farming has been illegal in the UK on grounds of public morality, yet this country remains a part of the fur trade through import, manufacturing and retail export.

We, the undersigned, call upon the UK government to introduce legislation to ban the import of all animal fur into the country.
